

# VOLCANO HIKE

La Soufrière is one of the most active volcanos in the world, and we will both see the smoke and smell the fumes. We leave the hotel early in the morning to go down to Sainte Claude which we will reach after 1,5 hours. The minibus takes us up at 900 meters of altitude, and in the company with your guide, we will now climb Guadeloupe's highest point at 1467 meters above sea level. We will pass some impressive viewpoints and make it through different types of nature. On the way up to the volcano's crater, you will experience the rainforest and magnificent views. When we finally come back down to the foot of the volcano, it's possible to take a relaxing bath in a hot volcanic spring.

## Highlights

- Hike up an active volcano
- Enjoy the views of Guadeloupe
- Safe hike with guide

The excursion is in English & French, with a guide, lunch and transportation included.
